SUMMARY

Full-stack web developer with hands-on experience building Laravel and React applications, developing RESTful APIs, and deploying projects using Docker and WordPress. Experienced in collaborating on production systems and passionate about creating scalable, user-friendly software.

PROFESSIONAL EXPERIENCE

Full-stack Web Developer | SyncPoint Strategies **Apr 2026 - Present (On-call)**

Stack: **Laravel 12, Tailwind CSS, Docker, WordPress, HTML5 and JavaScript**

- Developed and maintained CRUD functionalities for multiple system modules, enabling efficient data management and streamlined business operations.
- Built responsive and user-friendly interfaces with Tailwind CSS, ensuring a consistent experience across desktop and mobile devices.
- Integrated Laravel backend logic with MySQL databases to process forms, validate user input, and manage application data securely.
- Collaborated with the development team to implement new features, resolve bugs, and enhance application performance and maintainability.

PROJECTS

Facial Recognition Enabled Access Monitoring System **Oct 2025 - Apr 2026**
Thesis Project

Stack: **PHP 8, Python 3, OpenCV, ArduinoUNO, HTML5, JavaScript, Tailwind CSS and MySQL**

- Developed a machine learning-based access control system integrating facial detection technology.
- Implemented modules for performance tracking and data management, enabling real-time monitoring of 500+ student records and reducing report generation time by 50%.
- Designed an automated attendance and logging system that records user data in real time.
- Utilized Python for facial detection and machine learning functionalities, achieving 95% recognition accuracy and reducing false positives by 20%.
- Integrated PHP, HTML, Tailwind CSS, and MySQL for system management and monitoring.
- Improved security and efficiency through automated access management.

Academic Performance Monitoring System **Mar 2025 - Apr 2025**
Personal Project
Stack: **HTML5, JavaScript, Tailwind CSS3, PHP 8 and MySQL**

- Designed and developed a web-based system for monitoring teachers' and students' academic performance.
- Implemented modules for performance tracking and data management.
- Developed responsive user interfaces using HTML5 and Tailwind CSS3.
- Managed backend functionalities using PHP and MySQL.
- Improved accessibility of academic data for administrators and stakeholders.

E-Commerce Management System **Jan 2025 - Feb 2025**
Personal Project
Stack: **HTML5, JavaScript, Tailwind CSS, PHP 8 and MySQL**

- Designed and developed a full-featured e-commerce management system for a sneakers and apparel store.
- Implemented product catalog, category management, search, shopping cart, and secure checkout modules.
- Built an administrative dashboard for managing products, categories, users, and customer orders.
- Developed order history, order tracking, and user profile management features.
- Integrated activity and audit logging to improve security, monitoring, and system accountability.
- Optimized the user interface for a responsive and seamless shopping experience.

SKILLS

- **Programming Languages:** PHP 8, Python 3, JavaScript, HTML5, CSS3, Java
- **Frameworks & Libraries:** Laravel 12, React, Tailwind CSS, Bootstrap 3, React Native
- **Tools & Technologies:** Git & GitHub, XAMPP, Docker, WordPress, Composer, VS Code, InfinityFree, x10Hosting, Supabase
- **Database:** MySQL, Postgres

ADDITIONAL SKILLS

- **Administrative Skills:** Data Entry, Data Management & Organization, Data Cleaning, Microsoft Excel, Google Sheets, Microsoft Word, Google Docs, File & Document Organization, Online Research, Basic Reporting, Task Organization
- **Soft Skills:** Attention to Detail, Time Management, Written Communication, Problem Solving, Adaptability, Organization

EDUCATION

Bachelor of Science in Information Technology

Visayas State University
Relevant Coursework in Web Development, Networking and Database Management Systems

LANGUAGE

- **English**
- **Tagalog**
